

The Future of Hybrid Dentistry

September 2, 2021 5:30 - 8pm

Course Learning Benefits

Join us for dinner & drinks on Thursday, September 2nd, and learn about Crystal Ultra® nano-ceramic full arch hybrids and how they are taking over the full arch industry. Light-weight, adjustable, and reline-able; they are proving to be a strong alternative to the traditional restorations being used for full arch. We will be discussing benefits of using a nano-ceramic and how it's better for both doctors and patients.

Crystal Ultra® Hybrids create a feel that closely resembles natural tooth enamel. This leads to greater comfort and less applied stress on implants.

ULTRA
FEEL THE DIFFERENCE™

PROGRAM AT A GLANCE

- Date:** Thursday, September 2, 2021
- Time:** 5:30 - 6:00 pm, Registration, Drinks, Dinner
6:00 - 8:00 pm, Presentation
- Location:** Helm Dental Laboratory Technology & Training Center
2726 Capital St., Wylie TX 75098
- CE:** 2 AGD PACE credits
- Fee:** Compliments of Crystal Ultra
- Register:** SusanDerryberry@HelmDentalLaboratory or phone 972-442-9772

9000+ Successful Cases

6x Stronger Than Acrylic

At 492MPa, Crystal Ultra's compressive strength is greater than that of any other nanoceramic, acrylic, or PMMA making it one of the strongest nanoceramic materials in use for cosmetic and implant dentistry.

60% Lighter Than Zirconia

A finished arch of Ultra/Trilor weighs about 21 grams, compared to a monolithic zirconia arch weighing about 51 grams. This eliminates "clacking" and headaches caused by heavy zirconia

Shock Absorbing

Crystal Ultra's 0.7GPa Vicker's Hardness makes it the only ceramic that feels and closely resembles natural teeth. Its gentle shock absorbing characteristics eliminates the "heavy clacking" typical of traditional Zirconia restorations and will not wear out natural or Denture teeth on the opposing.

Adjustable Chairside

Ultra is finished using only light cure, meaning that adjustments and relines can easily be done chairside by the Doctor with any light cured composite.

PRESENTER: Matt Kobneck, Crystal Ultra

With an increasing need of implant supported dentures, Matt Kobneck will discuss the opportunity that lies in the disparity of these restorations while providing a restorative option that is better for patients and dentists.

COURSE OBJECTIVES:

- Material Choices for Full Arch Restorations
- Understanding Full Arch Hybrids
- Material Characteristics of Crystal Ultra
- Full Arch Patient Education
